CONTENTS

MONDAY 19 MAY 2025

GLOBAL MARKET DEMAND

Harry Fisher | Benchmark Mineral Intelligence 4
Drivers of the Energy Transition·What to Watch for in the Nickel, Cobalt, and Copper Markets

DEEP SEA NODULE MINING AND PROCESSING

Mike Dry | Arithmetek 42
Processing of Sea Nodules: A Techno-Economic Evaluation of Selected Options

SOLVENT EXTRACTION METHODS

Hannu Laitala | Metso 52
Organic-Phase Preloading and Enhanced Dispersion Separation in an SX Process

Mitshabu Godfrey | BASF 81
Experience with Iron Transfer across Some Copper Solvent Extraction Plants of the Democratic Republic of Congo

LEACH METHODS

Wolfgang Keller | EKATO 108
New Impeller Innovations for HPAL Applications

Goutam Das | CSIRO 120
Processing of Nickel Laterites through Hydrochloric Acid Leaching Route

Carlos Perea | Curtin University 139
Recovery of Base and Platinum Group Metals from Sulfide Ores Using Glycine Technology: An Integrated Process Approach

Adriana Garces | Draslovka 160
Recovering the Precious Metals Values before Copper

CONTENTS

TUESDAY 20 MAY 2025

PROCESS OPTIMISATION

Aleef Rahman | Jenike & Johanson 180
Integrating Dynamic Scale Modelling and Discrete Element Method Modelling for Enhanced Transfer Chute Design

Chris Madin | JordProxa 200
Achieving High-Purity Battery-Grade Nickel and Cobalt Sulphate through Well-Designed Crystallisation Process Plant

Jess Page | WGA 230
Process Optimisation Using Advanced Modelling

Joel Odwyer | CSIRO 246
An Online Mineral Analyser for Process Monitoring and Control

MINE WASTE STREAM AND TAILINGS REPROCESSING

Milton Simukoko | Konkola Mineral Resources 263
Reprocessing of Old Refractory Tailings: A Case Study of a Zambian Mine
